

EV Car Club of America was created to cultivate and promote passion for electric vehicles and sustainable clean energy. The organization will inspire “enthusiasm” for Electric Vehicles and camaraderie among the club members via social gatherings, website message boards/forums, technology events, driving events and a monthly magazine called the [GIGAWATT](#)

Founded in 2019, EV CCA is in the very early stages of development with the goal of having multiple car club chapters in each of the 50 states. Members are eligible for discounts on parts and services, vehicle rebates and admission to member only events.
